Maksym Yakhymets

Motivated and hardworking Bachelor of Science graduate, in Computer Science with 16 months of co-op work experience, passion for continuous learning, and professional development. Seeking professional employment in IT.

Toronto

Summary

I'm currently a student at Ryerson University studying Computer Science. I'm interested in various fields of study; including Software Development, Web Development, Security, and more. I'm mostly excited and passionate about Software Development. I'm on track to obtain my Bachelor of Science Degree (B.Sc.) in 2022.

Student, sport-enthusiast, pet lover, and most importantly codaholic

Experience

Ontario Ministry of Government and Consumer Services

I&IT Technical Developer

September 2021 - December 2021 (4 months)

Toronto, Ontario, Canada

- Tested and contributed towards a Service Ontario project initiative helping hundreds of customers daily.
- Worked on a regular basis with internal clients to recreate a crucial internal application using modern technologies.
- Created and updated the web application user interface as well as multiple components using Angular daily.

Ryerson University

Technical Support Assistant

January 2021 - April 2021 (4 months)

Toronto, Ontario, Canada

- Working and helping students with their academic success, by offering coding support (Java, Python, SQL).
- Currently in charge of the computer science department's social media pages, where I make weekly postings.
- Conducted a Java workshop for over 80 people, where I was teaching Java and building a Connect Four game in Java.

SS&C Technologies

Product Engineer

May 2020 - August 2020 (4 months)

Toronto, Ontario, Canada

Worked in the Product Engineering team and helped the company transition various company wide projects to Maven projects. List of tasks I was able to perform and collaborate on:

- Helped transition company wide projects to Maven projects
- Analyzed project JAR files, and helped in the creation and editing of project POM files
- Created documentation for various processes in the transition of projects to Maven projects
- Tested functionality of projects based on changes made to project Maven builds
- Created Bash scripts that aided with the functionality of the mavenized projects

International Financial Data Services (IFDS)

Desktop Support Analyst

May 2019 - August 2019 (4 months)

Toronto, Canada Area

Worked as a part of an IT team that solved various technical issues on a daily basis. Solved technical issues ranging from troubleshooting software to providing new hardware. Managed company's hardware inventory, and worked on a ongoing company wide performance benchmark IT project.

Kingsway College School

IT Support Technician

June 2018 - August 2018 (3 months)

Toronto, Canada Area

Worked collaboratively with the System Administrator to prepare the school's system and technology for the next school year. Repaired over 300 computers, laptops and portable devices by following instructions and contacted product's technical support if further issues persisted. Imaged most of the school computers to run using KCS protocol using IPV 4 and set specific administrator settings.

Education

Ryerson University

Bachelor of Science Coop Program - BS, Computer Science · (2017 - 2022)

Bishop Allen Academy

Highschool Diploma · (2013 - 2017)
